

LIST OF U.S. CUSTOMS LABORATORY METHODS

USCL NUMBER	METHOD	TITLE
75-01	ASTM E 39	<u>Methods for Chemical Analysis of Nickel</u>
75-02	ASTM E 76	<u>Test Methods for Chemical Analysis of Nickel-Copper Alloy</u>
75-03	ASTM E 107	<u>Test Methods for Chemical Analysis of Electronic Nickel</u>

U.S. CUSTOMS LABORATORY METHODS

USCL METHOD 75-01

Index

ASTM E 39 Methods for Chemical Analysis of Nickel

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

1 SCOPE AND FIELD OF APPLICATION

These methods cover procedures for the chemical analysis of nickel and nickel-base alloys. These are among the methods that can be used to determine the composition of nickel and articles thereof provided for in Chapter 75 of the Harmonized Tariff Schedule of the United States (HTSUS).

ASTM E 76 Test Methods for Chemical Analysis of Nickel-Copper Alloy

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

1 SCOPE AND FIELD OF APPLICATION

These methods cover procedures for the chemical analysis of nickel-copper alloys. These are among the methods that can be used to determine the composition of nickel alloys and articles thereof provided for in Chapter 75 of the Harmonized Tariff Schedule of the United States (HTSUS).

ASTM E 107 Test Methods for Chemical Analysis of Electronic Nickel

SAFETY PRECAUTIONS

This method does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to its use.

1 SCOPE AND FIELD OF APPLICATION

These methods cover photometric procedures for the chemical analysis of nickel, intended primarily for use in electronic devices. These are among the methods that can be used to determine the composition of nickel and articles thereof provided for in Chapter 75 of the Harmonized Tariff Schedule of the United States (HTSUS).
